Helio Systems - New Joiner Onboarding Guide

Welcome to Helio Systems! This guide explains what to expect during your first weeks. Your onboarding is coordinated by the People Team.

Day 1

On your first day, collect your laptop from the IT desk at 10:00 AM. You will receive your company email account, VPN profile and a hardware security key for multi-factor authentication. Your manager will introduce you to your onboarding buddy, an experienced colleague who answers day-to-day questions during your first 3 months.

First Week

All new joiners must complete the mandatory security awareness training within 7 days of their joining date. Access to the source-code repository is granted only after the training is completed. You will also complete the HR orientation session and set up your payroll details in the first week.

30-60-90 Day Plan

In the first 30 days you focus on learning the product and tools. By day 60 you are expected to complete your first independent project. At day 90 you have a probation review with your manager, which decides your confirmation.

Contacts

For laptop and account problems contact the IT desk at it-help@helio.example. For payroll and leave questions contact the People Team at people@helio.example.
